

TOBE BRANN

FEEL-GOOD EDM · MELODIC PROGRESSIVE HOUSE

ABOUT

The long road

Tobe studied **Business Information Technology** and leads a small software development company — developer, UI/UX designer, and project manager by day. Music has always run parallel to the work.

It started with **FL Studio** at **sixteen**. For nearly two decades he wrote music that almost nobody heard — through university, through the day job, through every rough patch in between. The drive kept coming back.

At **thirty-five**, he decided to stop hiding the work and professionalize. He switched DAWs from FL Studio to **Bitwig** and took production coaching — first from **Jan Kalt** of Schraubfabrik Mannheim, later from **Sebastian Schilde** (ex-Scooter). Vocal coaching, learning to DJ, rounds of track feedback, first collaborations, ghost producing. Then **"Lost in the Night"** caught — and a string of releases followed.

In **May 2026**, he was officially certified as a **Bitwig Trainer**. He now offers 1:1 production sessions and workshops at the **JON School for Music & Writing** in Mannheim, Germany.

Right now the studio is being rebuilt and the house is mid-renovation. **New music returns later in 2026.**
